FACT BOOK

Textron Inc. is a \$12.1 billion multi-industry company with approximately 32,000 employees. The company leverages its global network of aircraft, defense and intelligence, industrial and finance businesses to provide customers with innovative solutions and services. Textron is known around the world for its powerful brands such as Bell Helicopter, Cessna Aircraft Company, E-Z-GO, Greenlee, Jacobsen, Kautex, Lycoming, Textron Systems and Textron Financial Corporation.

*Textron Inc. consists of numerous subsidiaries and operating divisions.
Please refer to the back cover for legal entity structure.*

KEY EXECUTIVES

Scott C. Donnelly
*Chairman and
Chief Executive Officer*

Scott C. Donnelly was named chief executive officer in December 2009 and chairman of the board in September 2010. Donnelly joined Textron as executive vice president and chief operating officer in June 2008 and was promoted to president in January 2009. Prior to joining Textron, Donnelly was president and CEO for General Electric (GE) Aviation. He also held various other management positions since joining GE in 1989.

Scott A. Ernest
*Cessna Aircraft Company
President and CEO*

John L. Garrison Jr.
*Bell Helicopter
President and CEO*

Ellen M. Lord
*Textron Systems Segment
President and CEO*

Frank T. Connor
*Executive Vice President
and Chief Financial Officer*

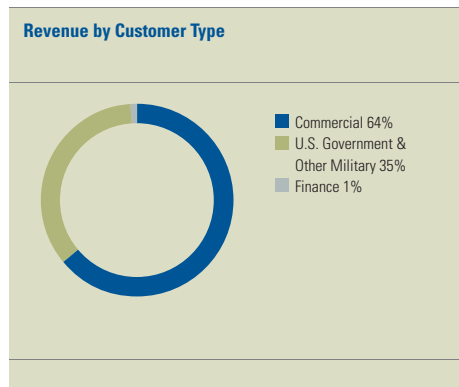

Frank T. Connor joined Textron as executive vice president and chief financial officer in August 2009. Connor came to Textron after a 22-year career at Goldman, Sachs & Co. where, most recently, he was managing director and head of Telecom Investment Banking. Prior to that, he served as Goldman, Sachs & Co.'s chief operating officer of Telecom, Technology and Media Investment Banking.

J. Scott Hall
*Industrial Segment
President*

John D. Klopfer
*Finance Segment
President and CEO*

FINANCIAL HIGHLIGHTS

¹ Segment profit is an important measure used for evaluating performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense and certain corporate expenses. The measurement for the Finance segment includes interest income and expense along with intercompany interest expense.

² Our Manufacturing group includes all continuing operations of Textron Inc., except for the Finance segment.

³ Calculation of return on invested capital ("ROIC") is provided on page 12.

⁴ Calculations of Manufacturing cash flow before pension contributions are provided on page 11.

(As of March 1, 2014)

Textron Inc. Credit Ratings

Fitch	BBB-	F3
Moody's	Baa3	P3

COMMITMENT TO FUTURE GROWTH

1. Scorpion Hybrid ISR/Strike Aircraft

2. Bad Boy Buggies Ambush iS

3. Mechtronix FFSX™

4. Beechcraft King Air 350i

Investing for future growth, organically and through acquisitions, is a key focus for Textron. Here are a few illustrations of key examples from 2013. There are also many more examples contained within the Segment sections.

1. Textron AirLand, LLC, introduced the Scorpion tactical jet, a hybrid Intelligence, Surveillance and Reconnaissance (ISR)/Strike aircraft platform. The Scorpion successfully achieved first flight in less than 24 months.

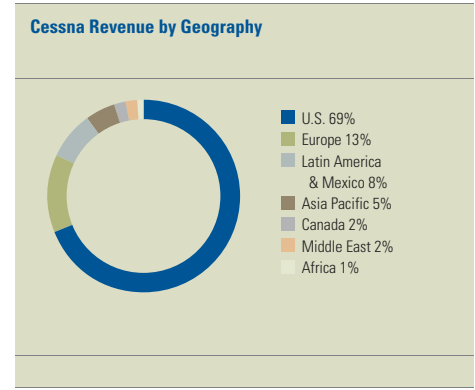

2. Bad Boy Buggies introduced the Ambush iS, a new generation 4x4 Hybrid with switchable powertrains, and the ability to recharge its own batteries.

3. Textron Systems formed new Training & Simulation business by combining the two recent acquisitions of OPINICUS Corporation and Mechtronix, Inc. with its existing training and simulation business.

4. Announced our intent to acquire Beechcraft Corporation, which designs, builds and supports aircraft, including the King Air turboprops such as the one pictured. The transaction is expected to close during the first quarter of 2014, subject to closing conditions, including regulatory approvals.

Citation M2

CESSNA

23% Cessna's share of Textron 2013 revenues

Cessna is the world's leading general aviation company based on unit sales with two principal lines of business: Aircraft sales and aftermarket services. Aircraft sales include Citation jets, Caravan single-engine utility turboprops and single-engine utility and high-performance piston aircraft. Aftermarket services include parts, maintenance, inspection and repair services.

FAST FACTS

- > At the end of 2013, Cessna had approximately 7,600 employees worldwide.
- > Manufacturing facilities are located in Wichita and Independence, Kansas; Columbus, Georgia and Chihuahua, Mexico.
- > In its 86-year history, Cessna has delivered nearly 200,000 aircraft, including more than 155,000 single-engine piston airplanes; more than 2,200 Caravans; more than 1,000 military jets; and more than 6,600 Citation business jets. Cessna has delivered more jets than any other private jet manufacturer.
- > Cessna Citations represent the largest fleet of business jets in the world and are registered in more than 100 countries.
- > Cessna provides customers across the globe with the world's largest general aviation service network made up of 15 Citation Service Centers, 42 mobile service platforms and a broad complement of authorized service facilities located in more than 25 countries. During 2013 the service team surpassed 10,000 mobile service visits.
- > Robb Report named the Cessna Citation CJ4 and the Cessna Citation XLS+ the "Best of the Best" in their respective categories.
- > With certifications of the Grand Caravan EX, TTx, Citation M2 and Citation Sovereign+ during 2013, Cessna has announced, certified and delivered 18 new aircraft models during the past 10 years.

Depreciation and amortization	\$ 87	\$ 102	\$ 109	\$ 106	\$ 115

¹ In 2013, included \$28 million in severance costs. In 2012, included a \$27 million charge related to an award against Cessna in an arbitration proceeding. In 2009, segment profit includes a \$50 million pre-tax gain on the sale of the assets of CESSCOM, Cessna's aircraft maintenance tracking service.

STRATEGIC STEPS FORWARD

- > Unite Cessna and Beechcraft into a single aviation powerhouse serving a more diverse set of product segments across a growing, global customer base.
- > Drive penetration of the M2, Sovereign+, Citation X+, Grand Caravan EX and TTx in the global marketplace while progressing certification of the breakthrough Citation Latitude towards first deliveries in 2015.
- > Accelerate growth in aftermarket services through innovative product offerings and upgrades that increase the resale value of pre-owned aircraft.
- > Design new products with advanced technology that delights our customer base. Recent examples include: state of the art avionics and cockpit design, auto throttles, cabin management systems, patented cabin seating that maximizes passenger comfort and diesel technology that enables piston products to run on Jet-A for greater efficiency.
- > Innovation in our manufacturing processes such as use of advanced monolithic structures that improve build quality while providing greater efficiency in build operations.
- > Global expansion of our direct selling force and company-owned service facilities to get closer to our customers and open up greater selling opportunities on a world-wide scale.
- > Provide turn-key training aircraft and support services for global military operations and drive penetration of highly effective ISR capability at a responsible cost to enable global military operations to succeed in today's complex defense mission landscape.

¹ Backlog for 2010 and 2009 has been revised from the amount previously reported, primarily to correct an error made in the fourth quarter of 2009 when the full value of a V-22 contract was included in backlog rather than Bell's proportionate share.

FAST FACTS

- > At the end of 2013, Bell Helicopter had approximately 11,000 employees, of which 27% were located outside the U.S.
- > Major facilities are located in Fort Worth, Texas; Amarillo, Texas; Ozark, Alabama; Piney Flats, Tennessee; and Mirabel, Québec, Canada.
- > Approximately 13,000 Bell Helicopter aircraft are flying in more than 140 countries.
- > One third of the world rotorcraft fleet carries the Bell Helicopter brand
- > Worldwide service network of more than 100 Bell Helicopter authorized Customer Service Facilities and eight Bell Helicopter owned or operated service and distribution centers, two of which are jointly operated with Cessna: one in Singapore and one in the Czech republic.
- > The Bell-Boeing Joint Program Office was awarded the second Multi-Year contract for an additional 99 Ospreys (92 MV-22, 7 CV-22) with options for another 23.
- > Received #1 ranking in three of the aviation industry's most prominent customer surveys: Aviation International News' (AIN) 2013 Product Support Survey for the eighth consecutive year; Rotor & Wing's OEM Excellence Ratings; and Professional Pilot's Helicopter Product Support Survey for the 20th consecutive year.

STRATEGIC STEPS FORWARD

- > Continue production of the V-22 for the U.S. Marine Corps, Air Force Special Operations Forces and market to other U.S. Department of Defense and international customers.
- > Continue production of the UH-1Y utility helicopter and AH-1Z attack helicopter and pursue international opportunities.
- > Maintain investment in the upgrade and development of military-focused products including the development of next-generation tiltrotor technology for future product offerings.
- > Unrelenting focus on meeting the mission needs of commercial customers and improving global competitive position.
- > Strengthen the commercial product line by upgrading existing products, developing derivatives and introducing new models.
- > Develop Bell Helicopter's global business through increased local presence with a stronger sales and marketing team.
- > Continue to grow Bell Helicopter's integrated support and services business through geographic and service offering expansion.
- > Strengthen cost competitiveness through continued improvement in worldwide manufacturing footprint and modernizing business systems.

COMMERCIAL BUSINESS

- > Introduced the Bell 505 Jet Ranger X, a new five-seat aircraft designed to offer best-in-class value as Bell Helicopter plans to reenter the short light single market it created decades ago. First flight is expected in 2014.
- > Enhanced the Bell 525 Relentless specifications to include a flight cruise speed of 155+ kts, a range of 500+ nm, a useful load of 7,400+ lb, and a maximum gross weight of over 19,300 lbs. First flight is expected in 2014.
- > Introduced product upgrades including: the Bell 407GT, an armed version of the popular Bell 407GX, the Bell 412 EPI, with the Bell Basix Pro™ fully integrated glass flight deck, and the Bell 429 Wheeled Landing Gear.

MILITARY BUSINESS

- > Introduced the Bell V-280 Valor, Bell Helicopter's third generation tiltrotor which is designed to offer the U.S. Army the highest levels of technical maturity and operational readiness.
- > Eight of the Marines' MV-22 Ospreys provided emergency assistance and humanitarian aid to victims of Typhoon Haiyan in November.
- > Delivered first HMX-V22 to serve Presidential and other special mission needs.

Shadow®

TEXTRON SYSTEMS

14% *Textron System's share of Textron 2013 revenues*

Textron Systems is a supplier to the defense, aerospace, homeland security and general aviation markets, addressing key problems at home and abroad by rapidly delivering affordable innovations that work, including unmanned aircraft systems, marine and land systems, smart weapons and sensors and various mission support services.

FAST FACTS

- > At the end of 2013, Textron Systems had approximately 4,800 employees.
- > Manufacturing facilities are located in Lutz, FL; New Orleans, LA; Slidell, LA; Wilmington, MA; Hunt Valley, MD; Williamsport, PA; Goose Creek, SC; Austin, TX; Sterling, VA; Notting Hill, Australia; Québec, Canada; and Hamble, England.
- > The 120+ Shadow Tactical Unmanned Aircraft Systems currently in service with the U.S. Army, U.S. Marine Corps, U.S. National Guard, and internationally with Sweden and Australia have logged more than 200,000 flights and more than 880,000 flight hours.
- > Through 2013, over 9,400 vehicles of 11 different variants have been sold to the U.S. Army and international customers.
- > Over 7,400 Sensor Fuzed Weapons (SFW) have been ordered by customers, including the U.S. Air Force, Oman, Turkey, United Arab Emirates, India and Saudi Arabia.
- > Overwatch has over 16,800 active licenses with U.S. intelligence agencies, military branches and unified commands, with more residing within classified programs domestically and abroad.
- > With more than 350,000 engines designed and built during Lycoming's 80+ year history in aviation, and over 200,000 still in operation worldwide, Lycoming powers more than half of the world's piston powered rotary-wing and fixed-wing general aviation fleet.

STRATEGIC STEPS FORWARD

- > Continue to expand our global presence to address worldwide military demand with an emphasis on leading edge, affordable and available line of networked systems.
- > Strengthen our position as a leading global supplier of Unmanned Aircraft Systems (UAS), armored vehicles and associated training, support, and services by sustaining and expanding the Shadow® UAS, Aerosonde® UAS, COMMANDO™ vehicle and ground control technology product lines alongside our expert simulation, training and logistics offerings.
- > Expand our role as a provider of affordable, smart area attack weapons, networked ground munitions, unattended ground sensors and compliant systems that minimize risk to noncombatants, while continuing to leverage our precision weapons expertise and solutions to meet the demands of today's complex and ever-changing battlefield.
- > Field critical new capabilities to support U.S and international militaries and agencies' data analysis, visualization and management requirements as they transition to next generation computing environments.
- > Utilize our growing vehicle mobility and survivability capabilities to address emerging domestic and international requirements, while executing on current production contracts for the Afghan National Army, Canadian Army and Columbian Army.
- > Continue to design, build and test aviation engine products with focused efforts on alternative fuels, unmanned platforms and other new applications.

Guided Clean Area Weapon (G-CLAW)

Commando™ Select with 90MM Direct Fire

Ship-to-Shore Connector (SSC)

MAJOR PRODUCTS

Product Line	Description
Unmanned Aircraft Systems	
Unmanned Aircraft Systems (UAS) and Ground Control Stations (GCS)	Multi-mission unmanned aircraft – including the Shadow® tactical UAS, Aerosonde®, Orbiter and Shadow M2 – and interoperable, networked Universal GCS for a variety of UAS, including the U.S. Army’s One Systems® GCS for its extended-range, multipurpose UAS.
Logistics and Technical Services	Leading unmanned systems services as well as comprehensive life cycle support, sustainment and operational services for defense and security equipment worldwide.
Marine and Land Systems	
COMMANDO™ family of vehicles	Advanced wheeled combat vehicles used by U.S and international armed forces, including the COMMANDO™ Advanced, which is derived from our Armored Security Vehicles; the COMMANDO™ Select, which offers enhanced lethality, survivability, mobility, and sustainability; and the COMMANDO™ Elite offering superior direct fire and MRAP level 2 mine-blast protection.
Ship-to-Shore Connector (SSC)	SSC is the next generation of the Textron Marine & Land Systems produced Landing Craft Air Cushion (LCAC). LCAC is the cornerstone of the current U.S. amphibious capability.
Motor Life Boat (MLB)	In service with the U.S. Coast Guard, 117 MLBs fulfill multi-mission roles along the U.S. Atlantic and Pacific coasts. MLBs are also in use by agencies and militaries in Canada, Egypt and Mexico.
Weapons and Sensors	
Area Denial & Surveillance Systems	Real-time distributed networked systems autonomously detect, classify, report and engage threats with man-in-the-loop control. Products include urban and tactical unattended ground sensors (UGS) and the Spider XM-7 force protection system.
Smart Weapons	Family of products includes the Sensor Fuzed Weapon (SFW) and the next generation of precision guided weapons, such as BattleHawk™ and the Guided Clean Area Weapon (G-CLAW), that will provide the customer with an affordable, high accuracy and low collateral damage capability.
Simulation and Training	
Commercial Aviation Training and Simulators	High-fidelity full-motion simulators including the ODYSSEY™, FFSX™, and FFTX™. The ODYSSEY™ includes features such as the REALFeel® control loading and REALCue® motion controller. In addition to the Full Flight Simulators, there are options such as the FFT™ and Ascent® simulators, which provide flight trainers and training solutions for the global aviation markets.
Military Aircraft Training and Simulators	Delivering training and simulation support for U.S. and international customers using platforms such as C-17, B-1B, F-35, F-22 and the Shadow® unmanned systems.
Mission Support	
Test Systems	Innovative electronic warfare, aircraft system, missile warning system and other test equipment for the lab, training range, depot, flight line, and factory.
Intelligence Software Solutions	Multi-source intelligence, geospatial analysis and custom intelligence solutions to the Department of Defense, national agencies and civilian organizations, including intelligence software for the U.S Army’s Distributed Common Ground System (DCGS-A), Army’s Human Terrain System (HTS), and critical data fusion, exploitation, and analysis tools for the National Geospatial Intelligence Agency and others.
Lycoming Aircraft Engines	Piston aviation engines, including OEM, rebuilt and overhauled engines as well as a full line of cylinders and spare parts for the general aviation and experimental segment. The iE2 Integrated Electronic Engine Platform – a piston aviation engine system that reduces pilot workload, improves economy and allows airplanes to fly on alternative fuels – as well as lighter, alternative fuels capable engines for Light Sport Aircraft and other growing markets. Lycoming also produces engines for Unmanned Aerial Vehicles (UAVs).

- > Manufacturing facilities are located in 15 countries: Belgium, Brazil, Canada, China, the Czech Republic, Germany, Japan, Mexico, Poland, Portugal, Romania, Slovakia, Spain, the United Kingdom and the United States.

STRATEGIC STEPS FORWARD

Kautex is a leading global system supplier to the automotive industry. The company develops and manufactures blow-molded plastic fuel systems, selective catalytic reduction systems (SCR), windshield and headlamp washer systems, cast iron engine camshafts and plastic bottles and containers.

- > Increase global and local presence through strategic relationships and increase customer base with growth customers in all regions.
- > Expand sales in the fast growing emission reduction related segment with selective catalytic reduction system and carbon canister products.
- > Accelerate innovative technology and product development for alternative powertrain solutions.

Jacobsen offers a comprehensive line of professional turf maintenance equipment and specialized turf-care vehicles for golf courses, sporting venues, airports and municipalities, as well as commercial and industrial users. Brand names include Ransomes, Jacobsen and Cushman.

- > Improve our North American channel to better support our customers before and after the sale.
- > Increase presence in municipal sales channels to find more customers for our equipment.
- > Expand our global presence, especially in Asia and Latin America.

E-Z-GO is a leading global designer and manufacturer of golf cars, off-road utility vehicles and light transportation vehicles for golf courses, consumers and government, commercial and industrial users, under the E-Z-GO, Cushman and Bad Boy Buggies brands.

- > Continue expansion of product lines to drive growth in key segments and leverage adjacencies, particularly in the consumer and commercial sectors.
- > Accelerate growth of independent dealer and distributor network to build consumer and commercial distribution.
- > Expand worldwide distribution networks and global operational footprint to drive international growth.
- > Maintain pace of product development and increase domestic and global distribution to drive continued sales growth in the golf sector.

Greenlee offers a comprehensive line-up of professional grade products and solutions for the construction, maintenance, telecommunications, data communications, utility, and plumbing industries. Customers depend on Greenlee to deliver high quality, innovative solutions that focus on safety and drive workforce efficiency.

- > Augmented the Greenlee Utility product lines by acquiring two companies; Sherman & Reilly, Inc, a manufacturer of underground and aerial transmission and distribution products, and HD Electric, designer and manufacturer of power utility products.
- > Expand sales in adjacent utility and plumbing markets.
- > Accelerate innovative product development focused on enhancing contractor total cost productivity.
- > Grow sales in developing economies including Brazil, Mexico, China and India.

Sources of Funding

(As of December 28, 2013)

Finance Receivables

(As of December 28, 2013)

FINANCE

1% Finance's share of
Textron 2013 revenues

The Finance segment provides financing to customers purchasing products manufactured by Textron Inc. Textron Financial Corporation and its consolidated subsidiaries comprise the Finance Segment.

Capital contributions paid to Finance group	\$ 1	\$ 240	\$ 182	\$ 383	\$ 270

¹ In December 2008, Textron began a process to exit the non-captive portion of its finance business.

² Improvement in delinquency statistics in 2011 was primarily due to the transfer of the remaining Golf Mortgage portfolio from held for investment to the held for sale classification, along with the resolution of several Timeshare accounts.

³ Segment (loss) profit represents the measurement used by Textron for evaluating performance and for decision-making purposes. Segment (loss) profit for the Finance segment includes interest income and expense along with inter-company interest expense. In 2011, segment (loss) profit includes a \$186 million initial mark-to-market adjustment for remaining finance receivables in the Golf Mortgage portfolio that were transferred to the held for sale classification.

¹ Segment profit is an important measure used for evaluating performance and for decision-making purposes. Segment profit for the manufacturing segments excludes interest expense and certain corporate expenses. The measurement for the Finance segment includes interest income and expense along with intercompany interest expense.

² The second quarter of 2013 includes \$28 million in severance costs. The fourth quarter of 2012 includes a \$27 million charge related to an award against Cessna in an arbitration proceeding.

³ For 2011, includes a \$41 million impairment charge to write down certain intangible assets and approximately \$19 million in severance costs related to a workforce reduction at the segment.

⁴ For 2011, includes a \$186 million initial mark-to-market adjustment for remaining finance receivables in the Golf Mortgage portfolio that were transferred to the held for sale classification.

⁵ Special charges include restructuring charges of \$99 million and \$237 million in 2010 and 2009, respectively, primarily related to severance and asset impairment charges. In 2010, special charges also include a \$91 million non-cash pre-tax charge to reclassify a foreign exchange loss from equity to the income statement as a result of substantially liquidating a Finance segment entity. In 2009, special charges include a goodwill impairment charge of \$80 million in the Industrial segment.

⁶ For 2009, the potential dilutive effect of stock options, restricted stock units and the shares that could be issued upon the conversion of our convertible notes and upon the exercise of the related warrants was excluded from the computation of diluted weighted-average shares outstanding as the shares would have an anti-dilutive effect on the loss from continuing operations.

⁷ Diluted average shares outstanding assumes the exercise of stock options, the vesting of restricted stock units and the issuance of shares that could have been issued upon the conversion of our convertible notes and upon the exercise of the related warrants. The Company's convertible notes matured on May 1, 2013.

¹ In 2011, we changed the definition of our non-GAAP cash flow measure to exclude all pension contributions. Prior periods have been recast to conform to this presentation.

² We use Manufacturing cash flow before pension contributions as our measure of free cash flow. This measure is not a financial measure under generally accepted accounting principles (GAAP) and should be used in conjunction with GAAP cash measures provided in our Consolidated Statement of Cash Flows. Free cash flow is a measure generally used by investors, analysts and management to gauge a company's ability to generate cash from operations in excess of that necessary to be reinvested to sustain and grow the business and fund its obligations. Our definition of Manufacturing cash flow before pension contributions adjusts net cash from operating activities of continuing operations for dividends received from TFC, capital contributions provided under the Support Agreement and debt agreements, capital expenditures, proceeds from the sale of property, plant and equipment and contributions to our pension plans. We believe that our calculation provides a relevant measure of liquidity and is a useful basis for assessing our ability to fund operations and obligations. This measure may not be comparable with similarly titled measures reported by other companies, as there is no definitive accounting standard on how the measure should be calculated.

Average Invested Capital	\$ 4,435	\$ 3,873	\$ 3,945	\$ 4,203	\$ 4,515
Return on Invested Capital	13.0 %	17.5 %	8.4 %	8.0 %	5.5 %

¹ In 2013, income from continuing operations includes the following pre-tax items: \$28 million in severance costs in connection with a voluntary separation program at Cessna and \$15 million of charges related to our UAS fee-for-service contracts at Textron Systems. 2012 includes the following pre-tax items: \$37 million in charges related to our UAS fee-for-service contracts at Textron Systems and a \$27 million charge from an unfavorable arbitration award at Cessna. 2011 includes the following pre-tax items: \$41 million non-cash impairment charge to write down certain intangible assets and approximately \$19 million in severance costs at Textron Systems, \$186 million non-cash initial mark-to-market adjustment for remaining finance receivables in the Golf mortgage portfolio.

Return on invested capital (ROIC) is a non-GAAP financial measure that our management believes is useful to investors as a measure of performance and of the effectiveness of the use of capital in our operations. We measure ROIC by dividing ROIC income by average invested capital. ROIC income includes income from continuing operations and adds back after-tax amounts for 1) interest expense for the Manufacturing group, 2) special charges, 3) gains or losses on the sales of businesses or product lines and 4) operating results related to discontinued operations.

At the beginning of the year, our invested capital represents total shareholders' equity and Manufacturing group debt, less its cash and cash equivalents and any outstanding amounts loaned to the Finance group. At the end of the year, we typically adjust ending invested capital for significant events unrelated to our normal operations for the year such as acquisitions, dispositions and special charges.

Forward Looking Statements Certain statements in this Fact Book and other oral and written statements made by us from time to time are "forward-looking statements" which may describe strategies, goals, outlook or other non-historical matters, or project revenues, income, returns or other financial measures. These statements are only predictions and involve known and unknown risks, uncertainties, and other factors that may cause our actual results to differ materially from those expressed or implied by such forward-looking statements. Given these uncertainties, you should not place undue reliance on these forward-looking statements. Forward-looking statements speak only as of the date on which they are made, and we undertake no obligation to update or revise any forward-looking statements. In addition to those factors described in our Annual Report on Form 10-K and our Quarterly Reports on Form 10-Q under "Risk Factors", among the factors that could cause actual results to differ materially from past and projected future results are the following: interruptions in the U.S. Government's ability to fund its activities and/or pay its obligations; changing priorities or reductions in the U.S. Government defense budget, including those related to military operations in foreign countries; our ability to perform as anticipated and to control costs under contracts with the U.S. Government; the U.S. Government's ability to unilaterally modify or terminate its contracts with us for the U.S. Government's convenience or for our failure to perform, to change applicable procurement and accounting policies, or, under certain circumstances, to withhold payment or suspend or debar us as a contractor eligible to receive future contract awards; changes in foreign military funding priorities or budget constraints and determinations, or changes in government regulations or policies on the export and import of military and commercial products; volatility in the global economy or changes in worldwide political conditions that adversely impact demand for our products; volatility in interest rates or foreign exchange rates; risks related to our international business, including establishing and maintaining facilities in locations around the world and relying on joint venture partners, subcontractors, suppliers, representatives, consultants and other business partners in connection with international business, including in emerging market countries; our Finance segment's ability to maintain portfolio credit quality or to realize full value of receivables; performance issues with key suppliers or subcontractors; legislative or regulatory actions, both domestic and foreign, impacting our operations or demand for our products; our ability to control costs and successfully implement various cost-reduction activities; the efficacy of research and development investments to develop new products or unanticipated expenses in connection with the launching of significant new products or programs; the timing of our new product launches or certifications of our new aircraft products; our ability to keep pace with our competitors in the introduction of new products and upgrades with features and technologies desired by our customers; increases in pension expense or employee and retiree medical benefits; continued demand softness or volatility in the markets in which we do business; the inability to complete announced acquisitions; difficulty or unanticipated expenses in connection with integrating acquired businesses; and the risk that anticipated synergies and opportunities as a result of acquisitions will not be realized or the risk that acquisitions do not perform as planned, including, for example, the risk that acquired businesses will not achieve revenue projections.
